

How to view TERGO token balance:

NNS

1. Go to <https://nns.ic0.app/> and click the button "Sign in with Internet Identity" to sign in.

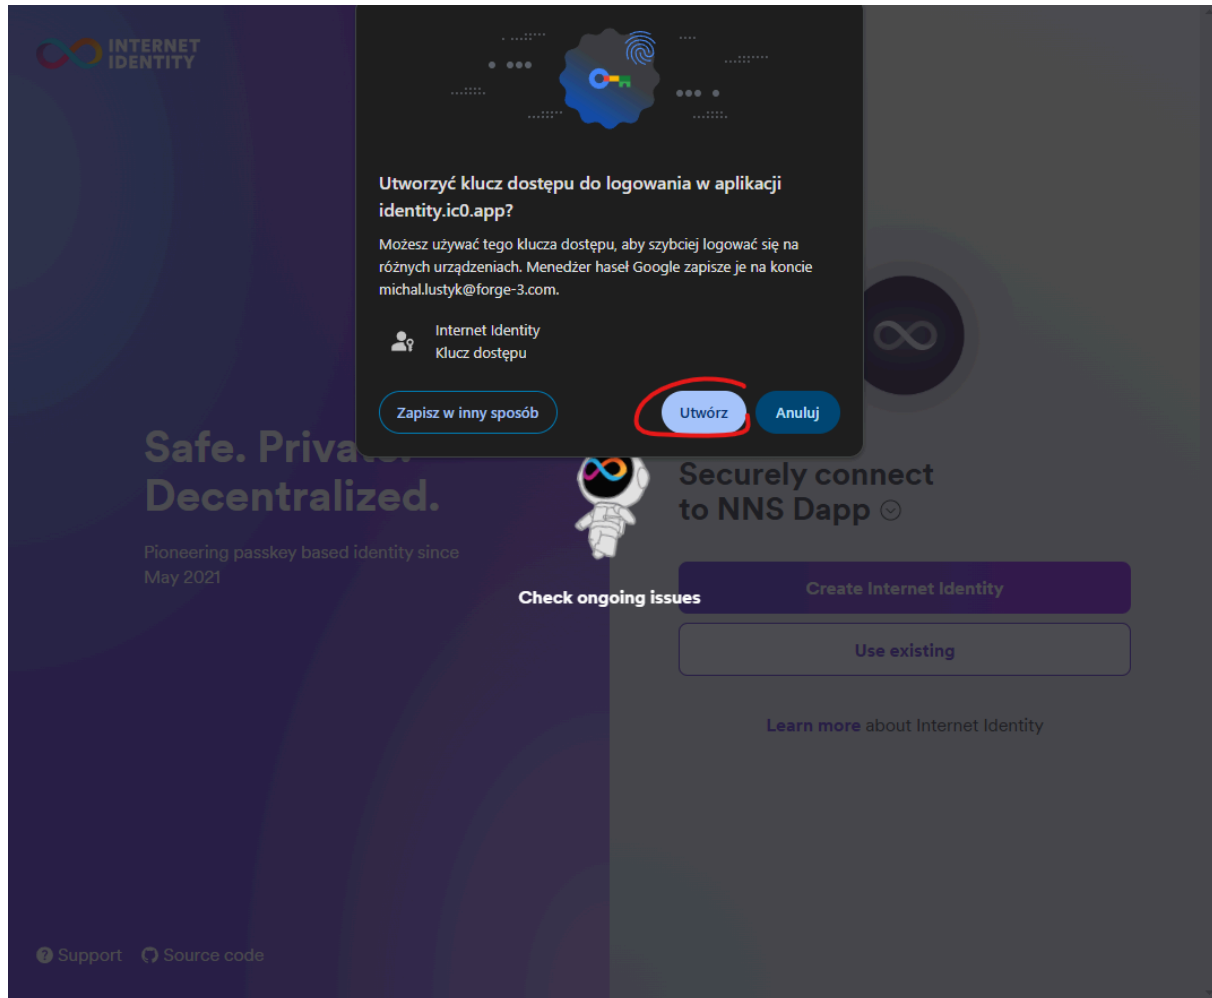

2.a. After a bow step you should be redirected to Internet Identity website (<https://identity.ic0.app/#authorize>). If you are on this website click “Create Internet Identity” (If you already have Internet Identity do to step 2.b)

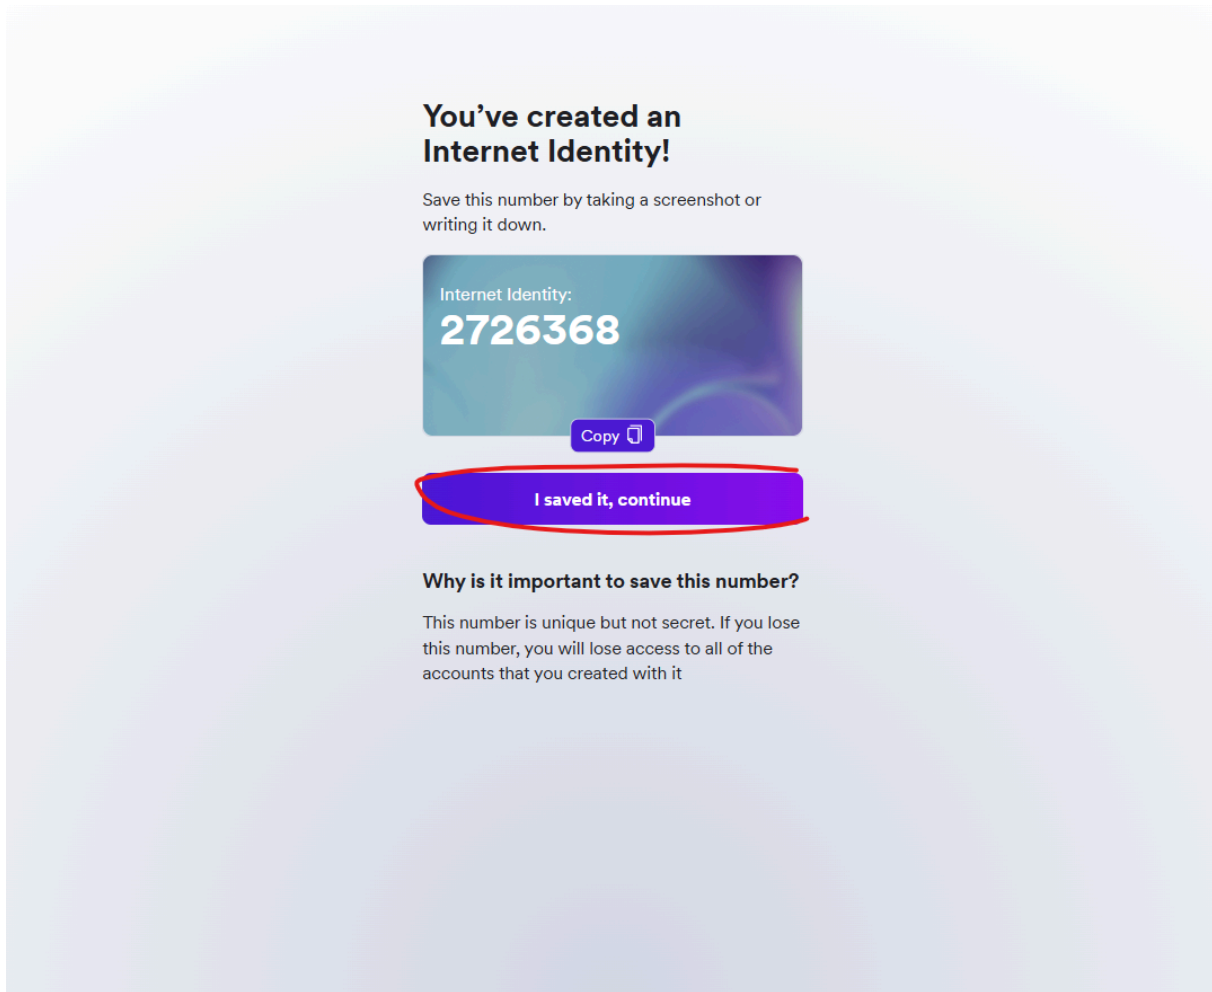

3.a. Clicking on this button will trigger generation of your local Internet Identity represented by a secret key that is securely stored on your device in encrypted form. Your crypto assets are as secure as your Internet Identity. Never reveal it to anyone.

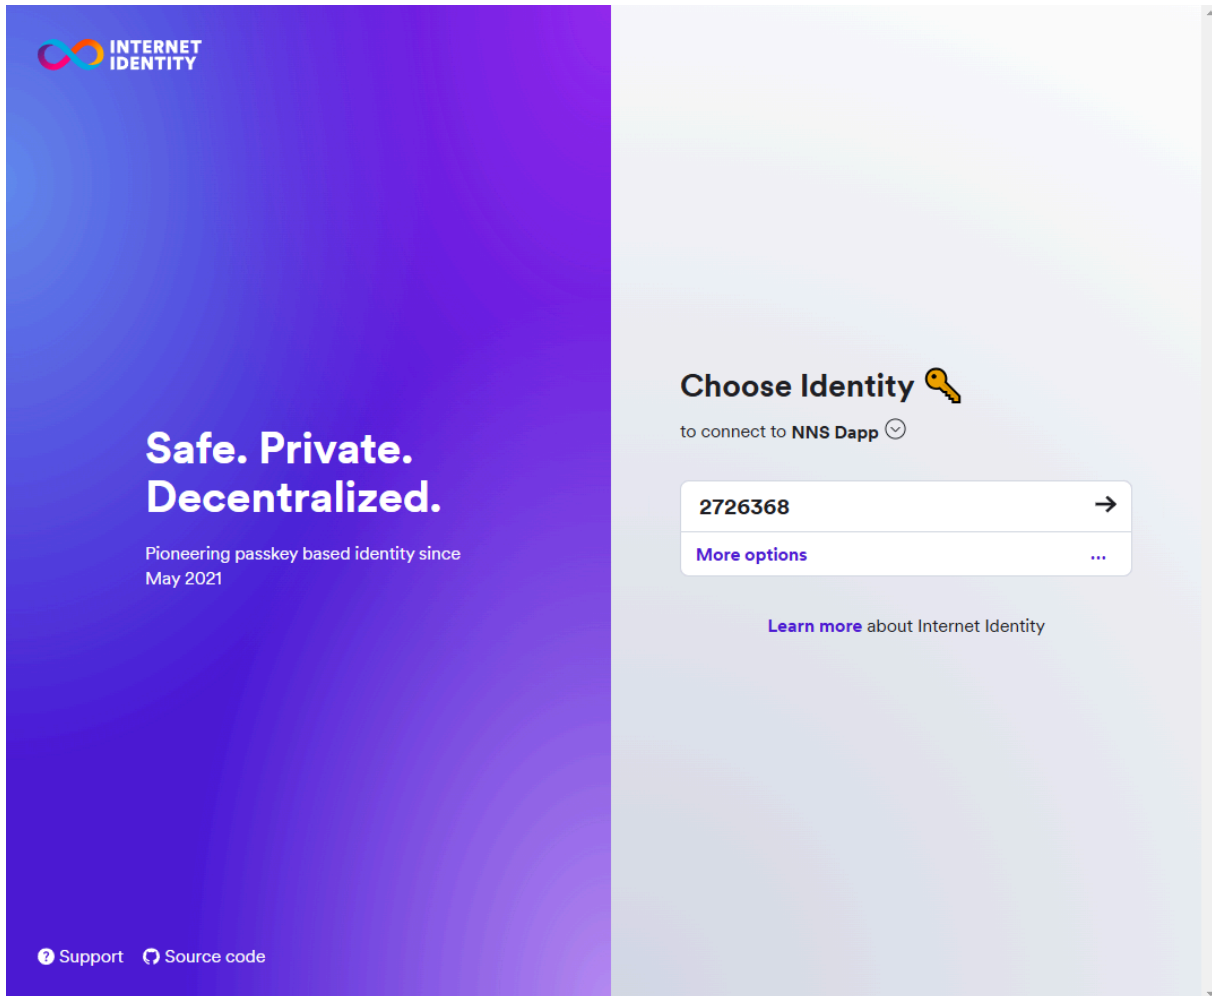

Click on this pop up to create your identity. After that you may be asked to set a pin that will let you use your identity when you need it.

4.a. You should be redirected to this website that keeps your internet identity id. Do everything as documentation on the website says. If you saved your number in secure plate click “ I saved it, continue”

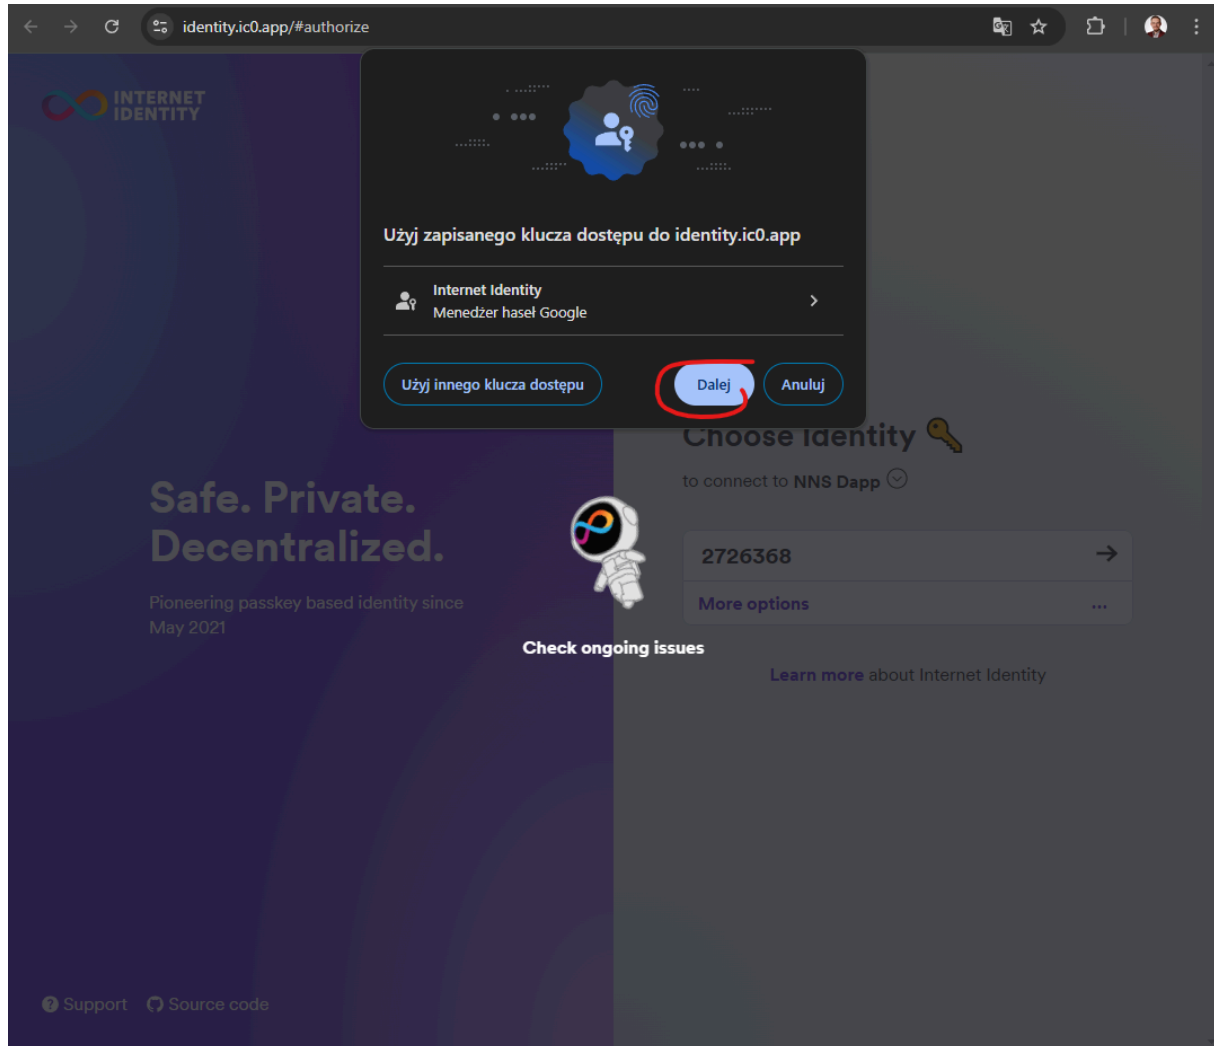

2.b. After a bow step you should be redirected to Internet Identity website (<https://identity.ic0.app/#authorize>). If you are on this website click on identity ID that you would like to use (If you do not have Internet Identity go to step 2.1)

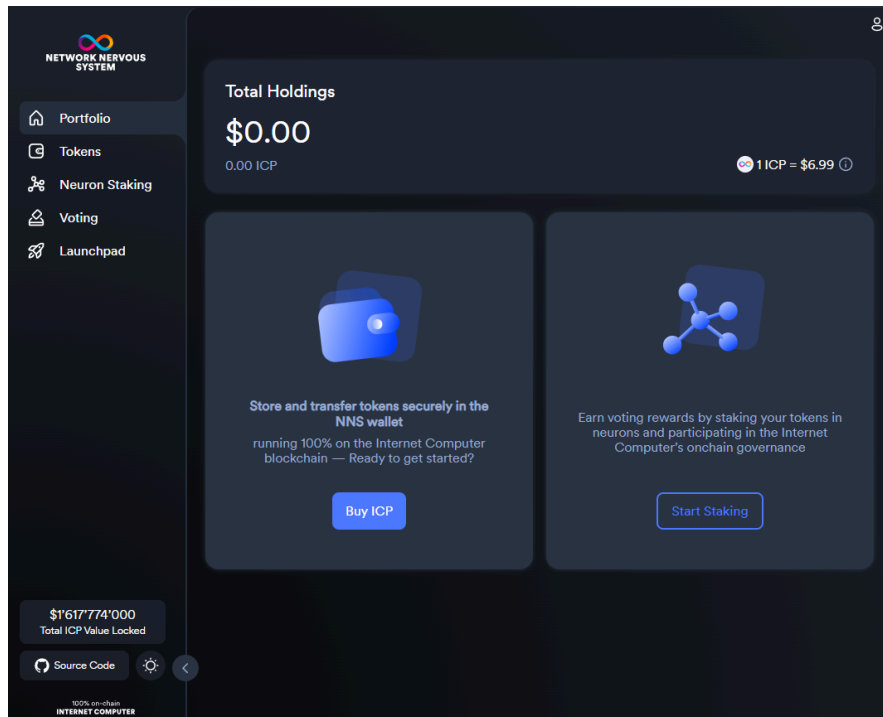

The screenshot displays the Internet Identity website interface. On the left, a purple gradient banner contains the Internet Identity logo (two interlocking circles) and the text "INTERNET IDENTITY". Below the logo, the text reads "Safe. Private. Decentralized." followed by "Pioneering passkey based identity since May 2021". At the bottom left of the banner are links for "Support" and "Source code".

The main content area on the right is light gray and features the heading "Choose Identity" with a yellow key icon. Below this, it says "to connect to NNS Dapp" with a dropdown arrow. There are two input fields: the first contains the number "2726368" and has a right-pointing arrow; the second contains the text "More options" and has a three-dot menu icon. At the bottom of this section is a link that says "Learn more about Internet Identity".

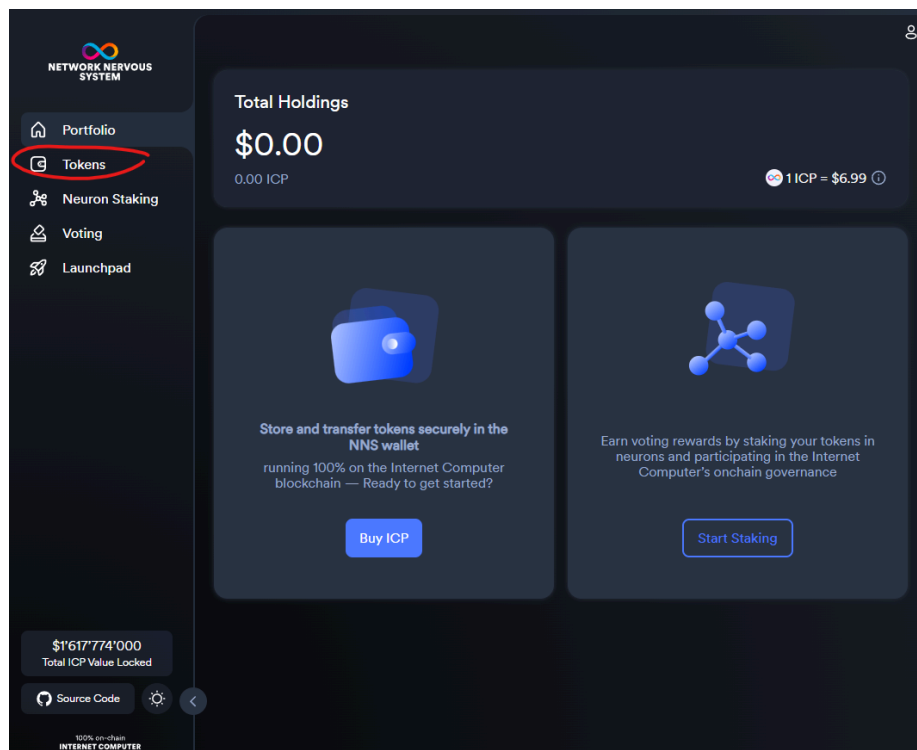

3.b. Continue logging in by decrypting your identity. Click "Continue" (Go to step 5)

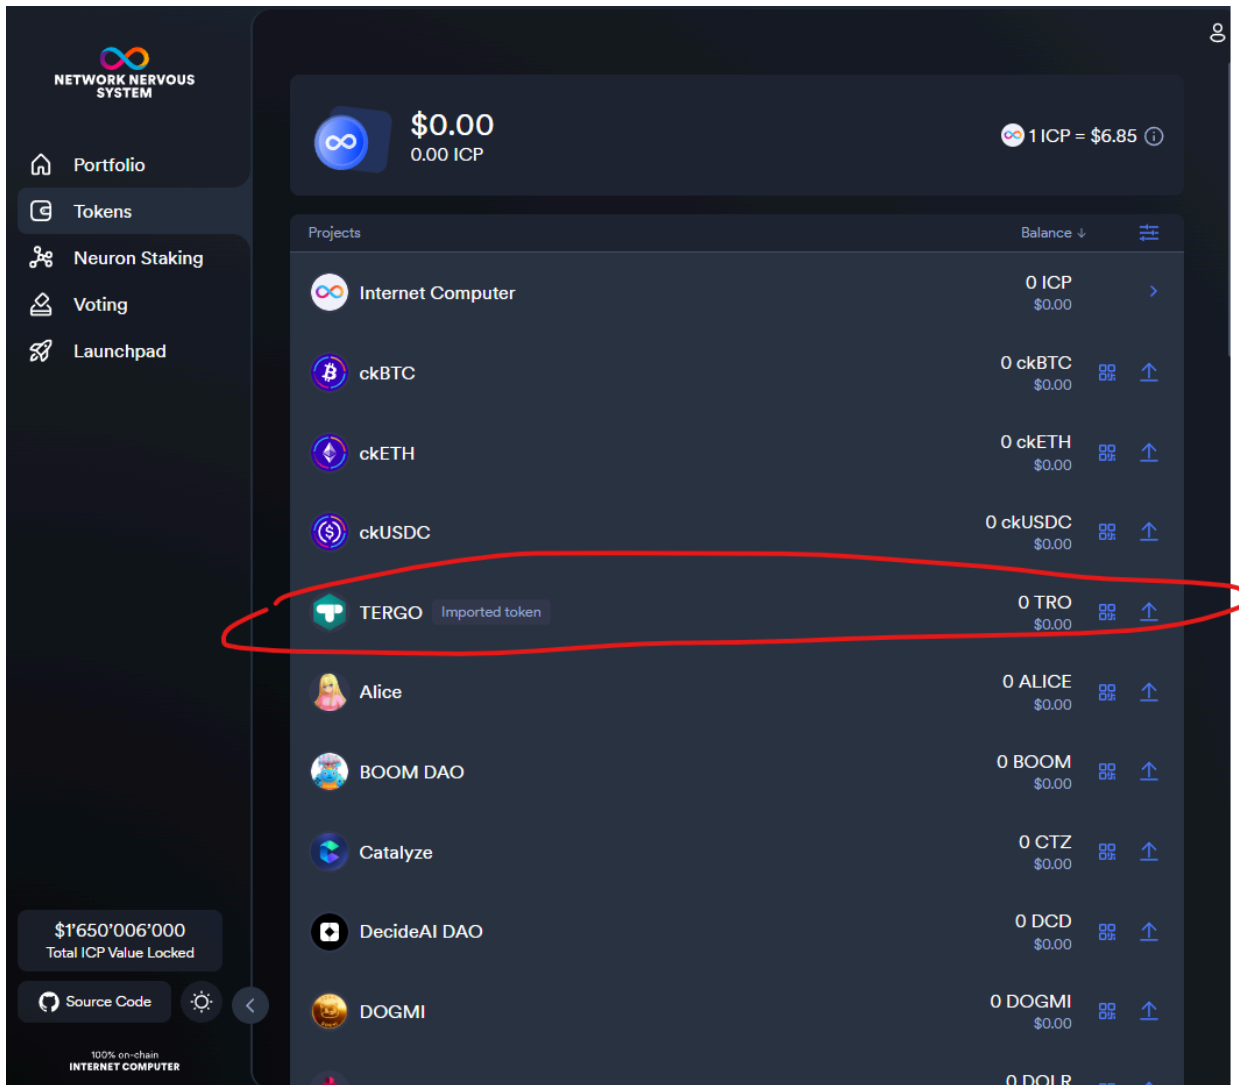

5. After that you should be logged in to your wallet

6. Go to "Tokens" tab

7. Here you may see all the tokens that you have. You may find a TERGO token. If you do not see this token go back to [How to add TERGO token to your wallet](#)

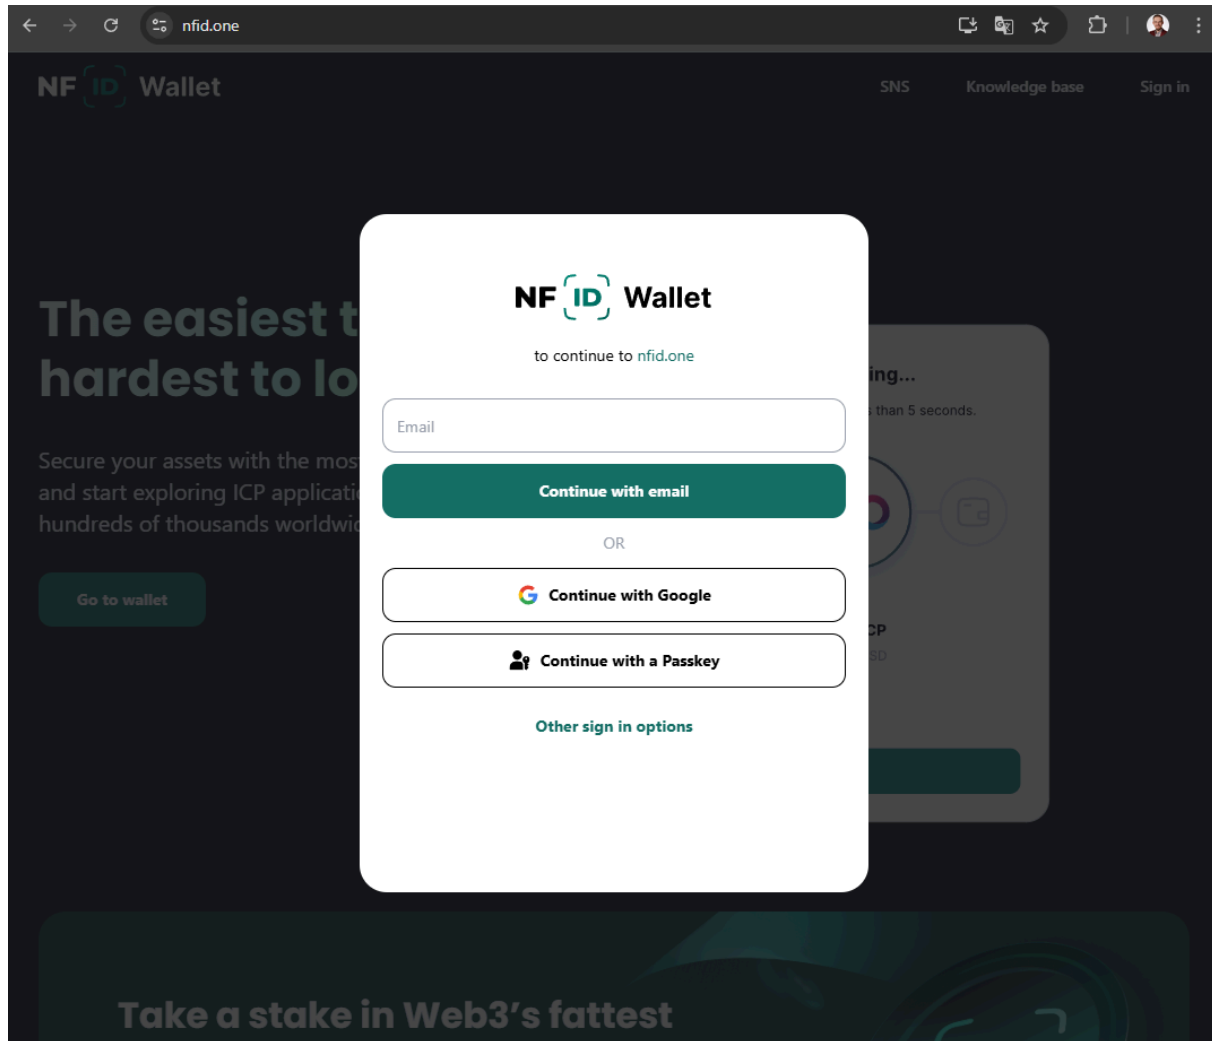

NFID

1. Go to <https://nfid.one/> and click the button one from corresponding buttons:

- Continue with email
- Continue with Google
- Continue with a Passkey

Choose one from the options and follow the instructions.

2. After you will be logged in you will be redirected to the dashboard of your wallet where you will be able to see a TERGO token in your wallet and amount of tokens that you held. If you do not see this token go back to [How to add TERGO token to your wallet](#)
